

SUCTION STRAINER

MODEL: SS

- A complete range of Suction Strainers suitable for flows from 15 LPM (3gpm) to 450 LPM (100gpm).
- The construction incorporates a stainless steel filtering media with a steel back-up perforated sheet held together with free flow epoxy bonding material.
- 149 micron filtration to give maximum efficiency at full flow.
- Maximum working temperature of 90°C

We also make filters as per customer specifications.

Model Selection chart					
Suction Strainer	Flow	Diameter (D)	Port Size	Thread Type	Material
SS	15	52	1/4"	BSP	P (Plastic)
	30	63	3/8"	BSPT	M (Metal)
	60	90	1/2"	NPT	
	90	140	5/8"		
	125		3/4"		
	160		1"		
	200		1 1/4"		
	250		1 1/2"		
			2"		
			2 1/2"		
			3"
